Hayes in 1855 vs. Hayes in 1858.

I read this morning the very able speech de, livered by Mr. S. S. Hayes Oct. 18, 1855, in this city, and I confess to you that it has made one Lincoln vote. It is true I voted for Fremont two years ago, but some how or other I had worked myself into the intention of supporting worked myself into the intention of supporting Douglas this tall. The stand he took last win, ter against the Democratic party, in Congress, had won my admiration. I had forgotten or and won my admiration. I had forgotien or overlooked his conduct in regard to the repeal of the Missouri Compromise. But the perusal of Mr. Hayes' speech has refreshed my waning memory of the unpardouable outrage committed in the inception and passage of the Nebraska bill, and, as an honest man, it would be impossible for me to east my vote for the Pro-Slavery agitator, Douglas. Before the publication of Hayes' speech, my mind was made up to vote

for that gentleman for Representative; but he has furnished me ample reasons and arguments for voting against him. If he was right in 1855, he is wrong now; and no man can read his speech without feeling that he told the truth, and exposed with a masterly hand the treason of Stephen A. Donglas to the people of Illinois. If Mr. Hayes is willing to stultify himself, it is no reason that others should do the same—essentiments in Oct., '55, and equally clear that he is playing the demagogue in Oct., '58.

ditors Press and Tribune:

I would suggest the propriety of striking off an edition of a few thousand copies of S. S. Hayes' speech against Douglas, delivered Oct. 18, 1855, in the form of a small handbill. At the different meetings Haves addresses, let this speech be circulated among the crowd. Not another word need be said. It is a perfect extinguisher on all that gentleman may utter be-tween now and the election. He proved to the satisfaction of every honest man that Douglas was a political villain and traitor to his constituents; and it is beyond the power of S. S. mind honestly and candidly, but now dissimulates, pettitogs and plays the part of a dema-gogue. Mr. H. can do Douglas no good by in 1858 without committing suicide.

The Board of Directors, by their agent, Rev' A. S. Kedzie, presented a full report of the action of that Board since their organization. From this it appears that three Professors have been appointed—a location of Union Park purchased—the seminary organized and classes organized comprising already over twenty members, eight or teh more being expected during the week. The erection of seminary buildings is not designed until it is foun dwhether the dormitory system can be dispensed with. A satinfactory exhibit was made of the finances of the seminary. Aid for indigent young men studying for the ministry was urged, and also the necessity of stirring up the minds of Christian young men to study for the gospel ministry. The causecration of the young to this work was shown to be needful to the full and healthful development of the Christian life of the church. Pending the completion of this election as an immated and protracted debate took place as to the mode of choice of such directors, and relative to adopting in such choice the principle of rotation in office, participated in by Rev. The wisest statesmen of Virginis have long deplored the loss of their most valuable citizens, and its enervating influence over the prosperity of the "Old Dominion" is patent to the observation of an ken can devise can cure the evil, save only the abolition of slavery. The same is true of Kentucky. Our city has shared largely in this emigration of talent, and also of capital, from that noble State. In all the capital, from that noble State. In all the walks of business you will find Kentuckians hemselves by working in competition with he slave—and of course the residuum will con be composed of the large planters, and polit cal and the social condition of a State whose people are rich, aristocratic slave-holders, who have no stimulus for exertion; slaves who, from necessity, are idle or as meanly so as possible and degraded to a point which makes humanity shudder; and the most ignorant, thrittless and hopeless of the white race—we repeat, what the social and moral condition of such a people must become it needs no banlet to divine. The "Quaker Vote" at Last.

The Boston Journal remarks: "The long missing Quaker vote in Pennsylvania has been heard from. It is alow, but sure when it comes."

To which the Providence Journal adds:

We selected the long expected "Quaker vote." We missed it in Uctober, 1886, and vain's looked for it in the coming November. Our Quaker friends are never fast, but they are famous for holding on when they come. We should judge by the relurns, that the mouthly meetings must be in a very flourishing condition in Berks County.

The ties are that it will reach Four about two wexts ago, one and Montgomery, which announced that Douglas would speak a Gillespie, Macoupin County, on the same day When it is understood that Gillespie is only termiles from this place, that it has a population Chicago, about the 10th of November, the great victory which the opposition have achieved over Lecompton and Dred Scott, it is necessary that our friends in the South and West Divisions go to work, and remain faithfully and steadfastly in the field, and at their appointed posts, until the votes are cast. Our German voters, by their activity and zeal in the good cause, are putting to shame their more apathetic brethren of other nationalities, unless we may except the Scandfanvians, who are organizing for the fight. To miles from this place, that it has a population of not more than three or four hundred, and that Bunker Hill is only nine miles further west on his road, and contains probably three times a many people, it will be obvious that there existed a design to prevent as many as possible from hearing Trumbull. In fact Douglas and his followers have uniformly exhibited the dread of Trumbull's specches that the devil is thought to entertain for holy water, or such as a large proportion of themselves entertain of waans, who are organizing for the fight. To make good our claim in behalf of the one Republican city in the Union, the American must put on the barness for a few days, and lend their strength in clearing out the enemy, as they did in 1856. What say they—shall

Daing the Judge's speece, word was orcognitrom Gillespie that Doughas would address his friends in this place in the evening. Arrangements had been made for Judge Palmer, of Carinville, to speak, but that genteman refused to do anything to prevent a single individual from listening to the "little giant," believing that he is doing more for Lincoln than any other man. The State Apportionment.

Early in the campaign we called attention
to the fact that the election of a Senator this
year was not the sole and perhaps not the chief thing to come before the next Legisla-ture. We alluded to the fact that the same s doing more for Lincoln than any other man Legislature which should make Mr. Douglas Senator, would carve up the State into Representative and Senatorial Districts, which would make another Dred Scottite Senator in place of Judge Trumbull, in 1860; that the election of a Pro-Slavery Legislature in 1860 would give that party the apportionment of the State for members of Congress after the next national census-in short, that a Demo-

discussion. Let it be known that the trients of the "hittle giant" in Montgomery County were afraid to risk a public discussion between him and John M. Palasen.

Mr. Paluer then followed Judge Trumbull in a characterist c strain of good humored but telling sureas, and the crowd dispersed. There were probably five hundred present, most of whom were clikzens of this county, and not more than thirty or forty were anything but straight-out Lincoln men.

At 7 P. M., the train from the west came in, bringing quite a crowd from Gillerspie. The entire crowd in the evening consisted of about six hundred, of whom at least one-half were Republicans. Douglas' speech was the essence of mendacity and blackguardism. Judge Palmer was right. The Little Giant has no more fatal enemy than Douglas—if we except perbas yelcohols.

Montgomery Connty has always been one of the strongholds of the bogus Pemocracy, butwell, but always had been strongholds of the hogus Pemocracy of the winded by a large influx of comers of the right class within the last two or three years, as well as by a great change of sentiment among the old settlers, the opp sition can now make a good show of hands. This is a glorious day for little Logan. Abe
Lincoln has just closed one of his noblest efforts here. The crowd in attendance is generally set down at five thousand. The Democrats What pestilent fellows the Paritans are, in-deed! They are now pushing their way, with their churches, school-houses, workshops they are kicking up. They have the consum-mate impudence, the infidels! to teach that the Christian Bible and the Christian religion admit that it was as large a crowd as Douglas had when he had the "show" to help him. This admission is tantamount, coming from a Doug-las man, to saying that we had about one or two nousand more than they did, and it may be re-membered that they claimed from seven to nation believe what their Divine Master has bid them declare; and lo! the result. The ight thousand at that time.

membered that they claimed from seven to eight thousand at that time.

The demonstration to-day was far beyond any thing that ever transpired in this part of the State. Two long trains on the St. Louis, Alton and Chicago Railroad—one from Springfeld and the other from Bloomington—came in about twelve o'clock, loaded down with live Republicans. The cannon announced the arrival of "Old Abs," and as soon as he made his appearance on the platform of the cars, such chears were never heard as continued for some time. Then came the Pulsaki, Sait Creek and Like Fors, delegations, like an army with banners. Soon after came Sogar Creek and Middletown, who were, joined by a large delegation from Delevan Prairie. The Atlanta delegation, composed of from 300 to 400, took the front in the procession, led by their band, and then came the delegations above mentioned, which occupied over a mile in lengal; after which the crowd dispersed for dinner. The speaking took place in front of the Court House, at two o'clock, when it was found that all were there who could get near enough to hear Mr. Lincoin speak.

I understand that Douelas is to speak in Atold them declare; and lo? the result. The Secretary of the Interior is to be invoked to take any action which he may deem expedient to avert the evils which follow their incendiary teachings. The following special dispatch from Washington to the New York Herald is proof of what we say:

as they have had heretofore. It seems that these mischievous agitators are at their old trade out there, busy brewing mischief, and actively engaged in sowing dissension among that people and arraying one portion against another, through the instrumentality of their emissaries—wolves in sneep's clothing—who were sent out for the ostensible purpose of preaching "peace on earth and good will among men." The Board of Missions, that have their headquarters in Boston and carry on all their machinations for mischief in that self-righteous and pharisaical city, it seems, have, for some ten or fifteen years, been laboring to impress their Cherokee converts with the idea that no slaveholder can enter the kingdom of heaven, and they, through their beat agent, a distinguished speak.

He used to declare that he would do away with the wearsome work of composition; and from day to day for years he employed his moments of leisure, if such men can be said to have leisure, in devising how the work could be performed by machinery. He at length succeeded. A machine was constructed, the works of which, though comparatively rude and imperfect, accomplished the desired object. The flabors of composition and distribution were performed simultaneously, and more correctly than is often adone by the printer. The imperfections were remedied in a second machine, the work of Messra, Reve & Co., at the corner of Canal and Centre streets, sind now little further improvement appears to be necessary before the laveation shall be introduced into large printing establishments.

In fact, they found a complete set of counterfeiting apparatus and contrivances for chemicals and paper, used for bank note purposes. In fact, they found a complete set of counterfeiting apparatus and construences for changing the denomination of genuine bills from ones to threes, fives, tens, &c. In a closet was found a copy of a bank note safeguard, describing the bills of every bank in the United States; also a handbook containing a fac simile of the signatures of the presidents and cashiers of the various banks in each State. A quantity of burned paper was, found in one of the grasses, which on assumination proved to be the remains of a number of imperfect counterfeits, which had been committed to the flames as worthless. Among other things seized by the police was a lot of counterfeit Turkish money, which no doubt formed a part of that discovered in Duane street lists week. How these pisate bills came into the possession of the presoners remains a mystery. On being questioned relative to this and other matters, they refuse to give any information relating thereto. Yesterday the accused were brought before Justice Quackenbuch at the Jefferson Market Police

THE COMMENCEMENT OF THE RACE—THE ERONAUTS OFF TO THE CLOUDS.

Notwithstanding the well directed efforts of Mayor Thomas, Chief of Police Radin and the force under their command (all of whom deserve credit for their exertions), the crowd almost overrun the balloonists before they left the ground. They broke down the 'ropes and surrounded the cars and balloons, hardly affording a passage way for communication between the two for the committee to arrange for their departure. The utmost anxiety prevalled to see everything and hear everything connected with this extraordinary and abvel undertaking.

At ten minutes mat 4 Prof. Steiner announced to the Committee that he was ready, and, jumping upon the hoops of his balloon, called to his rival to "come on." Some delay occurred in getting Monsieur tiodard's apparatus in readiness, but at twenty-one minutes past 4 the word was given by Mayor Thomas for a start, and both balloons were cast loose. Prof. Steiner started off a little in advance of his competitor, the promate standing receit in his car and waving the American flag to his thousands of friends below, who simultaneously joined in a shout that might have been heard over half the city. below, who simultaneously joined in a shout that might have been heard over half the city. The thousands upon thousands outside were no less enthusiastic in their admiration of the beau-tiful accent, and joined in the general huxza for the stare and stripes.

The balloon attained an altitude of perhaps a mile, and strack off directly in the wake of the "Niagara," the Professor waving a king and throwing out papers and handbills as he ascended. occasion of the approaching prize fight. The bills bear date March, 1888, and purport to be of a new issoe. As a specimen of art the coun-terfeit exceeds anything of the kind ever pro-

and throwing out papers and handbills as he ascended.

Monsieur Godard followed in a second or two after, rising beautifully above the immense throng, and starting off in the same direction. At the height of one or two hundred feet Monsieur climned from the basket upon the boops of the balloon, and waved a farewell with his cap to his friends below. The chase then become exciting. In racing parlance Steiner had the "inade track," followed hard and close op his powerful rival, who soon appeared to lap him for a sharp breath. Then Steiner seemed to open a gap of a lew rods, and in a minute after the two appeared to be neck and neck, sailing along mejestically.

The two balloons remained in sight for perhaps above quarters of an Bour, afth us take a could be determined by the eye, the general impression was, among the multitude, that Frofessor Steiner was a considerable distance abead. sterfeit \$20 bills on the People's Bank of Setting Types by Machinery.

impression was, among the multiwade, that Pro-fessor Steiner was a considerable distance shead of his rival, while the little "Ningara" had entirely disappeared from sight. Whether the American colors will be able to maintain the vantage ground gained on the first few miles, against the more powerful French representa-ive, remains to be determined. Both aeronauts carry with them printed des-patches to send down to terra firms whenever they press a form, with directions to have them hey pass a town, with directions to have them orwarded to the nearest telegraph station. How ong they will remain up, is a matter of conjec-ure. Should nothing unusual occur, they can men.

Accident to Morrissey, the Prize Fighter.

One of the mail agents on the Hudson River Railroad reported hast evening that an attempt was made to arrest Morrissey and Heenan in Boffalo, on Saturday, in order to prevent the coming prize light. Heenan secreted bimself in the city, and Morrissey walked out for some time on the Gentral track to clude the police. A freight train overtaking him, he attempted to jump upon one of this cars which passed, and, mistaking his step, was dragged for a considerable distance. A brakeman eventually discovered his satuation and sassisted him to get upon the car. His limbs were so much bruised that he will be lame for a considerable time. The wonder is that he was not dashed to piecea. It is atsted that he subsequently took some branch road leading from the Central, and thus escaped arress.—X. Y. Trib., Oct. 18. ongress.

The theatre was crowded with between two and three thousand spectators, and the curtain was up, displaying a common table, six feet long, upon the stage, at the very edge of which I obtained a seat having gone very early.

And at the givin time, the juggler, a singular looking man came upon the stage with his shirt sleeves rolled up to his shoulders and bearing a long heavy two-edged sword. He upset the table upon the boards, and showed that there was no concealed drawer or other recess and placed it in the blaze of the footinghts near the edge of the stage. In a few words he stated what he was going to do, and requested some of the audience to come forward upon the stage that they might see there was ao deepion. A number of nedical gentlemen who had been chosen as a committee to investigate the matter, if possible, took their postition upon the stage, and soon after the victim, who had been sitting in the parquette, mounted the stage, removed his coat and erwat, turned back his shirt collar sand laying down upon his back-on the table, elevated his chin to more fairly expose his neck to the headsman's weapon. The jugglerithen raised his keen and fearful looking sword, and giving it a wide sweep, brought it down—I say, brought it down upon the neck, for no one could see that he did not, even those with in three feet of him—upon the neck of the subject with creat force:

In about five minutes the lately decapitated man slowly turned his ghastly and altogether horrible face—white as snew—towards the audience, and excitement followed exceeding, if anything, that which occurred when the first blow of the sword fell. In a few moments the cyclids gradually opened and displayed the eyes wearing a glassy, corpse like stare; by degrees a life-like speculation came into them, some color returned to the face, and after stretching his limbs, the man rose from the table, resumed his coat, and walked down from the stage and mingled with the crowd. An Embarrassed Father—A Woman Claiming the Wrong Child.

The following true incident will show the dangers to which young children are sometimes exposed in the public squares of our city. A gentleman on Saturday afternoon was taking his little boy—an only child, about six months old—on an airing in Madison park, when suddenly a well-dressed woman, an entire stranger to him, rushed frantically after him, and with screams and violent gestures, demanded her child. The astonished father, of course, pushed her aside, and told her to clear off, upon which she persisted, attempting to lay hands on the baby, and drawing with her screams a large crowd, to witness the contest. Of course the crowd, with their usual humanity, synpathized with the breaved woman, until the un fortunate "parient" was compelled to call a policeman who took his tormentor away.

It seems a little strange that when there are so many unclaimed bables, she should be so anxious to seize an only child, the sole object of parential affection: The probability is, however, that the vixen, who was a goodlooking Frenchwoman, of about thirty or thirty five, had a lost baby, and seeing a handsome boy, had mistaken him for the one she was seeking. From the pertinactly with which he insisted on her claim, it is also probable that she would have succeeded in running off with the baby, had it not been La h, Shingles, Timber, Pickets DRESSED LUMBER. Cainoline a Philantheoric Institution.—
Crinoline, so much abused, has at last been vindicated by its inventor, Mr. Frick, who, having retired from business, is now building a palace with a fortune which many balloons have helped to inflate. Mr. Frick, in a letter which has jest been written to his directors, proves that even crinoline has its philanthropic side, since, thanks to the prodigious development of this branch of industry, twelve millions of farthingales have been constructed; that in the manufacture of these articles of the toilette four millions kilogrammes of steel and four millions metres of all sorts of dry goods have been employed, not to mention the fact that at least six thousand workmen have found profitable wages in the satisfaction the fact that at least six thousand workinen have found profitable wages in the satisfaction of this sumpluary factasy. Behold then, crinciline decidedly elevated to the height of a public benefit and a humane institution—Independence Belgs.

EXTRORDINARY COMPROMISE.—At the late Durbam assizes, a verry deaf old lady, who had brought an action for damages analyst a neighbor, was being examined, when the neighbor, was being examined, when the judge suggested a compromise, and instructed the counsel to ask what she would take to settle matters. "What will you take?" asked the gentheman in the bobtailed wig of the old lady. The old lady merely shook her head at the counsel, informing the jury in confidence that she was "very hard o' hearing." "His lordshp wants to know what you will take!" asked the counsel again, bawling as loud as he could in the old lady's ear. "I thank his lordship kindly" (the ancient dame answered,) "and if it's no inconvenience to him I'll take a little warn ale!" (Roars of laughter)

SHALER'S PATENT CARPET SWEEP

Money, Exchange, &c.—We have had another dull, stormy day, and its effect has been to check transactions of all kinds. Quotations remain unchanged, viz:—Exchange, 1 per cest; bank discount rates, 10 per cent. Money for strictly business purposes is plenty. Gold inactive at 1@1½ premium. The atreet brokers are doing very little at nominal figures—ranging from 1½@2 per cent. per month.

The following is from the commercial article of the N. Y. Times of the 18th:

The opinion seems to gain ground among the The opinion seems to gain ground among the oldest money lenders of the Street that dividend-paying securities will have to be more generally resorted to for the employment of private capital at fair rates than heretofore. The City Bank capital of \$57,000,000 and a line of undrawn deposits (unprecedented for the month of October) of \$85,000,000 aborb nearly all the merchant and other trade bills now making, and a very low rates of interest, and in addition Processing Street, Processing Street, 1990 but at \$150 to red Igd., Street, Igd. St or October) of 283,000,000 beach and at very low rates of interest, and in addition have also drawn to their portfolios nearly or quite two-thirds of the \$30,000,000 United States Treasury bills and stock recently created by act of Congress. The belief that this very easy state of things, so anomalous for the Fall season of the year, must continue for some time to come, its strengthened by the European sidvices by the last packet, which represent a similar condition of the discount markets in London and Peris, and a much larger accumulation of builton in the great banks.

Commencat.—The disagreeable weather, along with falling markets in the East, rendered Breadstuffs dull and heavy. The demand for Flour is still very limited. The teeling to-day Flour is still very limited. The feeling to-day was even heavier than yesterday—buyers in-sisting on a further decline. No transactions of any amount took place.

The Wheat market opened at yesterday's figures; but as soon as the Europa's news became known, all grades suffered a decline of 1@2c, About 15,000 bushels Winter and 20,000 bushels Spring changed hands at a range of 90@91%c for No. 1 Red; 79%@80c for No. 2 Red; 57@ mand. About 18,000 bushels changed hands at 52c for Canal affoat; 50c for No. 1 in store; 48c for No. 2; and 44c for Rejected. Market closing The Barley market remains manimate. Oats wear a The Barley market remains inanimate. Oats are quiet but steady. There is still an active demand for Timothy Seed, and prices tend upward.

Preights are very scarce, and there is no inquiry for vessels either to Buffalo or Oswego. A brig was chartered at 86 for Wheat to Kingston.

At Cincinnati, on the 18th, the Breadstuffs markets were unsettled. With regard to Provisions the Commercial says:

A good demand for Bacon, but holders ask 160 more than buyers are willing to pay, therefore but little was done. Mess Pork was selling at \$180 GLS, with a moderate demand.

At St. Louis yesterday the receipts of Wheat amounted to about 30,000 bashels, and the market declined. Flour was also heavier. Barley was firm. was firm.
At Louisville on the 18th, Mess Pork sold at At Louisville on the 18th, Mess Fork sold at \$44 50@45. The Journal says:

In Bacon the principal transactions were 1,200 hams at 3½c packed, 200 at the same price loose, 67 casks Shoulders at 5½c packed, a 76t at 6c, 60 days, and a few casks clear sides at 5½c, pkge extra. In lard a sale of 47 tierces prime at 10½c.

At Albany on the 18th, according to the At Albany on the 18th, according to the from New York for the week ending Oct. 14, 1857 and 1858, from the first of January to Oct. 14th, are thus given by the N. Y. Economist:
